

Bush Industries Quality & Safety Fact Sheet

Since its inception, Bush Industries has led the way in establishing the benchmark for quality furniture, adopting both mandatory and voluntary safety standards and embracing product innovation, functionality and the highest of design standards. Safety is one of the most critical components of Bush's manufacturing process. All of Bush's products are thoroughly tested to ensure they are safe, durable and perform to industry standards.

Bush Industries Quality Engineering Lab

Bush Industries has adopted rigorous design safety standards for all of its products. The Bush Quality Engineering Lab is staffed by ASQ-certified quality engineers and technicians who administer rigorous tests that comply with nationally recognized standards. From testing tip stability to leg strength and weight load, Bush products are put through the paces to make certain they are ergonomically correct and meet quality and safety guidelines. Certain tests may take up to six weeks to complete, but Bush Industries is committed to achieving the highest safety standards possible before taking a product to market. Proper testing on all furniture ensures that it is safe, durable and performs to expectations.

Third-Party Testing Standards

All of Bush Industries products must pass the rigorous testing process established to enable quality, safety and sustainability. The company's commercial-grade products comply with the nationally recognized standards of the American National Standards Institute (ANSI) and Business & Institutional Furniture Manufacturers Association (BIFMA). In addition, the company was instrumental in the development of the ANSI-SOHO standard, which is intended to provide a common basis of mechanical tests for evaluating the safety, durability and structural adequacy of storage and desk-type furniture intended for use in the small office and/or home office.

Green Practices

In addition to its commitment to quality and safety, Bush Industries is recognized as a good steward of the environment among its suppliers, partners and customers. The company is committed to meeting the standards established by BIFMA level, GREENGUARD, the U.S. Green Building Council and many others. Bush has dedicated manufacturing operations and productivity teams focused on driving social responsibility and sustainability throughout the company.

About Bush Industries, Inc.

Bush Industries, Inc. is a leading manufacturer of case goods and ready-to-assemble furniture designed for office and home applications. The company operates two North American divisions – BBF and Bush Furniture – along with its Rohr division in Germany and its China operations.
